## **Lotus Collector Set**

### **Lotus Central Tourbillon**

**18 PIECES**

45mm, grade 5 titanium

## **A Serene collaboration**

The Lotus Central Tourbillon timepiece, a collaborative creation by Marco Tedeschi and Alain Silberstein, skillfully crafted by Kross Studio, is a poetic tribute to serenity. Drawing inspiration from the profound wisdom of Eastern traditions, it captures the essence of tranquility and elegance in its design.

## KS 7'000 Caliber

The timepiece is equipped with our in-house KS 7'000 caliber. Conceived by Marco Tedeschi, this caliber stems from a desire to craft a horological complication with a notable power reserve.

The central positioning of the regulator and the tourbillon is the result of the substantial space taken up by the impressive oversized barrel, that affords the Lotus Central Tourbillon a 5-day power reserve.

## Peripheral time display

The time is elegantly presented through the peripheral hour and minute display, gracefully orbiting 360 degrees around the tourbillon. A 12-factor gear ratio allows the planetary minutes system to empower the progression of the hours. In order to optimize the movement's efficiency as much as possible, the hour and minute display system is fixed on two very wide and high-precision ball bearings.

## Case Back

Winding the watch and setting the time are effortlessly achieved using the «D-ring crown» on the case back and the «Time Set» push button, strategically positioned at 3 o'clock along the watch's edge. This push button, embodying Silberstein's distinctive bold graphic style, is intricately engraved and filled with a vibrant yellow lacquer, adding a touch of invigorating flair to the design.

On the case back, engravings of red circles align with the Kross Studio logo in a testament to this unique partnership between the Swiss design studio and Alain Silberstein, famed designer.

## Interchangeable Straps

The watch comes with two versatile straps: one crafted from black leather lined with rubber, and the other made entirely of black rubber.

The straps can be easily changed thanks to our interchangeable strap system, facilitated by two quick-release buttons conveniently placed on the underside of the case, allowing for seamless customization based on individual preferences.

# Technical Specifications

## CASE

**Diameter**  
45mm

**Thickness**  
20mm

**Thickness without  
crystal**  
12.5mm

Black DLC grade 5 titanium deployant buckle clasp

## The fundamental totem

The watch comes with a unique handcrafted art piece seamlessly combining visual allure with functionality, crafted specifically for this collaboration. The Totem comprises stacked forms, featuring a blue triangle, yellow square, and red circle interpreted in three dimensions. The Lotus Central Tourbillon finds its designated space within a compartment seamlessly integrated into the vibrant yellow cube.
